

# About CAPCA

The **Central Atlantic Precast Concrete Association (CAPCA)** started in December of 2006 with five producers who were looking to expand the use of precast concrete and to work with specifiers on written specifications and details.

CAPCA currently has five producers and sixteen associate members. We are working closely with the Maryland State Highway personnel to revise some specifications to make them work better for the specifier, the precaster and the end user.

## *CAPCA Mission Statement:*

*The Central Atlantic Precast Concrete Association is dedicated to the expanded use of precast concrete. We will educate specifiers and users as to the advantages and effective utilization of precast concrete products and systems. We will represent the industry in the Central Atlantic area.*

## *CAPCA Membership Application Form:*
